# Software For Your Safety Program

SAFETY 101
Proactive Safety Software

www.safety101.com

Manage Your Safety Program with One System
(across all locations)

Mobile Inspection App

Perform walk-around inspections, toolbox talks, JSA's and more

Training Tracker

Keep employee training current with system generated training plan...interface with your ERP, HR and LMS systems

Employee Portal

Supports OSHA guidelines for employee involvement

Document Handler

Store all your documents in one place

Incident Manager

Promotes consistent approach to incident investigations, root cause analysis, etc...

Alerts & Reminders

Prevents "safety things" from falling through the cracks

Reports & Analytics

OSHA 300 forms along with safety meeting reports, leading indicators, training forecasts, and more

1. Mobile Inspection App

- Build your own custom checklists:
  - Walk-around inspections
  - Toolbox talks (with attendee signatures)
  - Hazard analysis (JSA / JHA)
  - Confined Space Entry Permits ... and more

- Schedule one-time or recurring inspections

- Document findings with notes and pictures

- Share inspection results and resolve findings

- Operate in off-line mode (no cell service)
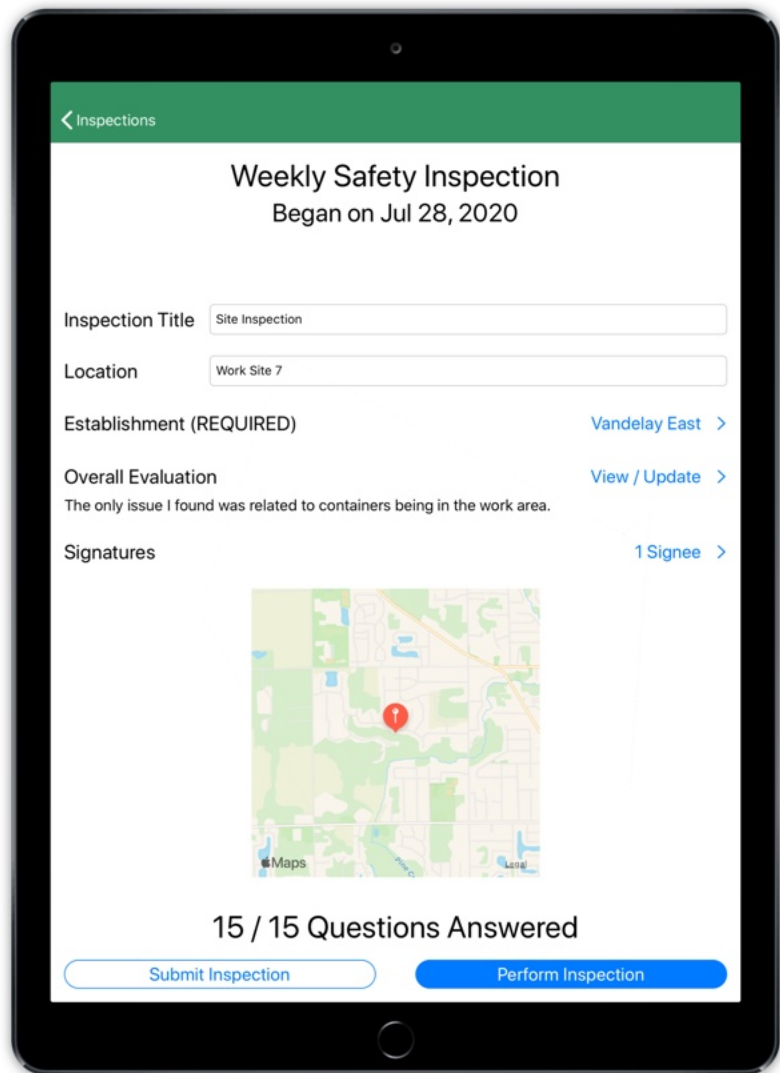

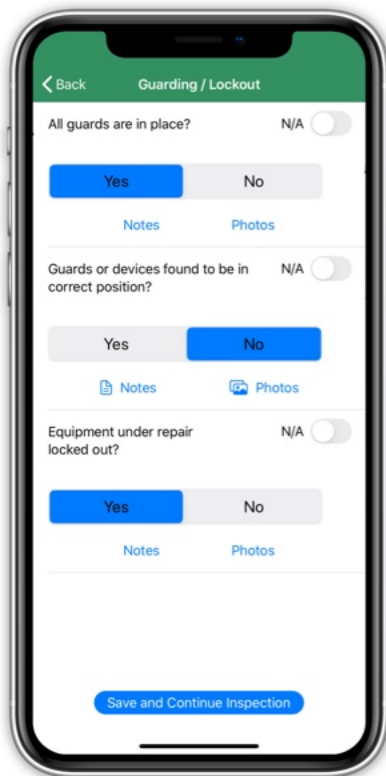

2. Training Tracker

- Ensure your teams have the training they need when they need it

- Interfaces with your ERP, HR and LMS systems

- System generated training plan includes courses needed and suggested attendees

- Dashboard lists upcoming courses along with team members with training that has expired or is set to expire

- Schedule courses, sign up attendees, record attendance

3. Employee Portal

- Provide your team an easy way to share ideas, report hazards and access documents

- Facilitate a "good-catch" reward and recognition program

- Access upcoming training course schedule

- Support OSHA guidelines for employee involvement

- Available in English, Spanish or French
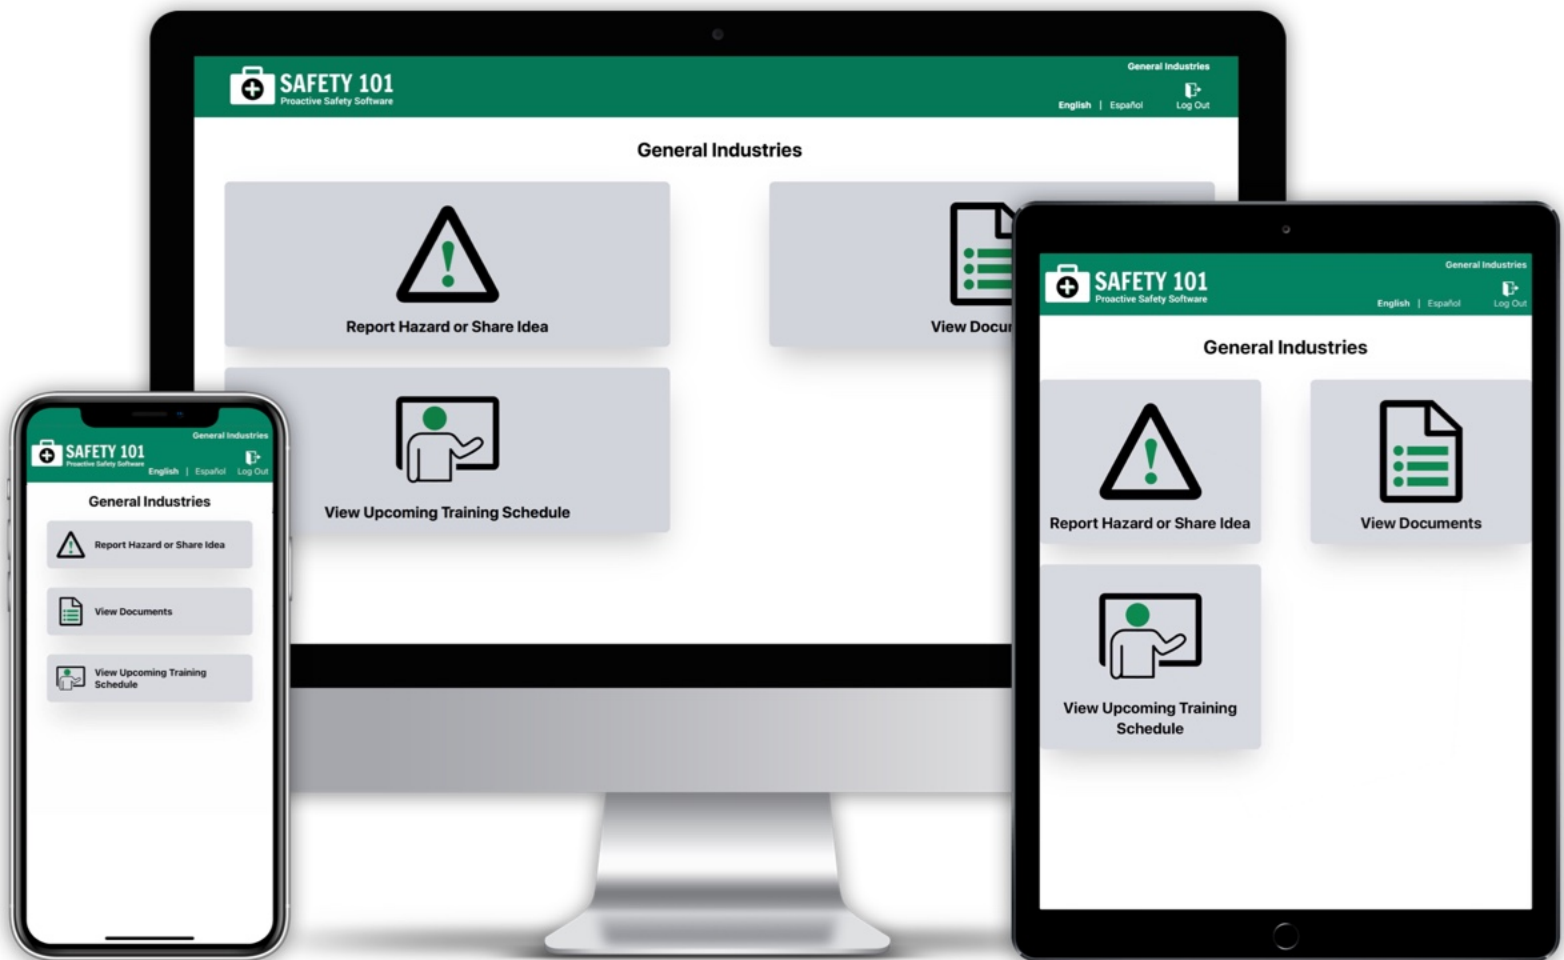

4. Document Manager

- Store all your documents in one place (emergency action plans, operating manuals, safety data sheets etc…)

- Schedule periodic document reviews

- Track document revision history

- Share selected documents with employees via Portal

- Access documents such as Lockout/Tagout forms and safety data sheets via QR code

5. Incident Manager

- Capture observed hazards, near misses and injuries as well as vehicle accidents, property damages and other incident types for all locations in one place

- Promote consistent approach to incident investigations, root cause analysis and corrective action implementation

- Perform periodic audits to ensure once a corrective action is put in place, it stays in place

- Generate OSHA 300 Forms and download 300A CSV for   electronic submittal to OSHA

6. Alerts & Reminders

Keep "safety things" from falling through the cracks with follow-up reminders and to-do lists

Pricing FAQ

Q. What is a system user?

A. Someone with a unique email address who has been granted authorization by a System Administrator to log in and use Safety 101.

Q. Is there an annual maintenance fee?

A. No.

Q. How do I get started?

A. Visit safety101.com/pricing and click "Buy Now"

Q. How much will it cost if my account uses more than 10 gigabytes of data?

A. You will be charged an additional $5 per month for each additional 10 GB's of data used. 10 GB of data is roughly:

- 31,460 PDF documents
- 6,140 photos
- 13 hours of video

Q. I want the Portal to be accessible from every plant floor computer and a tablet in the break room, how many devices can access my organization's Portal?

A. An unlimited number of devices (computer, tablet or phone).

Leadership Team

Clayton Carroll - Sales and Marketing

Before joining the Safety 101 team, Clayton was the National Sales Manager for Falcon RME, a Michigan based manufacturer of road maintenance equipment. During Clayton's six years at Falcon, sales grew an average of 32% per year.

Most recently, Clayton has focused on providing social media marketing services for both retail and industrial customers. Clayton holds a BA in Philosophy and Religion from Covenant College.

David Groulx - Software Development

Prior to Safety 101, David served as a computational mathematician for a variety of watershed projects sponsored by the University of California at Santa Barbara.

Over the past decade he has developed a number of business software systems including a web-based ERP system. David holds a BS from the University of Utah in Computational Mathematics.

DeLynn Taglauer - Sales and Marketing

DeLynn brings 10 years of safety leadership experience to Safety 101.

This experience gives her invaluable insight into the challenges facing busy, multi-tasking safety leaders. DeLynn has a BS in Psychology from Central Michigan University.

Mark Groulx - Business Development

Mark has served as CEO, COO, CFO, CIO and entrepreneur.

He is a six-time member of the Inc. Fast 5000 list of the fastest growing companies in the U.S. and a two-time Ernst & Young Entrepreneur of the Year Finalist. Mark has a BS in Computer Science from Michigan State University and an MBA.
